

Trần Văn Bách

TECHNICAL LEAD | FULL-STACK ENGINEER

+84 337 393 826 | bach.tv2000@gmail.com | An Khánh, Hanoi, Vietnam

PROFESSIONAL SUMMARY

Technical Lead and hands-on full-stack engineer with 4+ years of continuous professional experience since January 2022, building enterprise web, real-time, and AI-enabled products. Promoted to Technical Lead at InfiniQ Vietnam in January 2026, with end-to-end ownership across architecture, delivery, production deployment, observability, and operations.

CORE EXPERTISE

Technical Leadership

System Architecture

.NET / C#

React / Next.js

Distributed Systems

Production & DevOps

AI / LLM + Coding Agents

PROFESSIONAL EXPERIENCE

InfiniQ Vietnam

Feb 2025 - Present

Technical Lead / Team Lead

Jan 2026 - Present

Full-stack Software Engineer

Feb 2025 - Dec 2025

- Promoted to Technical Lead / Team Lead in January 2026 and now lead a cross-functional team of 11: 6 developers, 2 business analysts, 1 product/UI designer, and 2 QA testers.
- Architected and built IQ NFFICE end to end - a production enterprise groupware platform spanning 27 business modules, including RBAC, e-approvals, chat, notices, attendance, assets, and project management.
- Defined the platform stack with Next.js 16, React 19, TypeScript, and Tailwind CSS; .NET 10 Clean Architecture APIs with Dapper and PostgreSQL; SignalR and Redis for real-time communication; and Hangfire for background processing.
- Designed and deployed the production platform from the ground up: HA proxy and load-balancing gateway, active-active application and worker nodes, PostgreSQL replication, Redis Sentinel, NFS storage, Jenkins blue/green CI/CD, monitoring, backup, and disaster recovery.
- Integrated LLM-enabled capabilities for AI-assisted search, information retrieval, and workflow support while keeping the core groupware platform secure and maintainable.
- Lead the Daewoo Groupware outsource engagement for a Korean customer, adapting the NFFICE foundation to multi-company portals, electronic approval, real-time integration, and localized enterprise workflows.

SOFTMART

Jan 2023 - Jan 2025

Full-stack Web Developer

Hanoi, Vietnam

- Developed and maintained 3+ business applications serving more than 1,000 users; improved application performance by 30% through code and query optimization.
- Delivered full-stack features for LPBank Flex Collection and MCredit FLEX CPM using React, TypeScript, .NET, SignalR, PostgreSQL, and Oracle.

R&D MobiFone

Jan 2022 - Dec 2022

Software Engineer

Hanoi, Vietnam

- Delivered mFWA from January to July and Innovation Project Management from August to December, covering full-stack development across the complete employment period.

EDUCATION & LANGUAGES

Hanoi University of Science and Technology

Sep 2018 - Mar 2023

Engineer - Electronics and Communications | Early graduation | CPA: 3.0

Languages Vietnamese (native) | English (technical reading and written communication)

SELECTED LEADERSHIP & PROJECT WORK

IQ NFFICE	Engineer to Product Technical Lead	Feb 2025 - Present
- Joined as a Full-stack Software Engineer in February 2025 and was promoted to Product Technical Lead in January 2026; now lead delivery across development, BA, design, and QA. - Owned solution and UX design, architecture standards, hands-on development, release engineering, production deployment, and ongoing operations for the enterprise groupware product. - Engineered a highly available production topology with load-balanced gateways, active-active services, PostgreSQL replication, Redis Sentinel and SignalR backplane, background workers, shared storage, CI/CD, monitoring, and recovery runbooks. - Validated NFFICE dev at 150 VUs: 54,077 mixed-admin requests at ~100 req/s, 0% HTTP errors and 50.94 ms p95 latency. Built NFFICE's commercial on-premise licensing with ES256/JWKS, deployment binding, quotas, and online/offline activation.		
Daewoo Groupware	Outsource Technical Lead	2026 - Present
- Leading architecture and delivery for a Korean enterprise groupware solution based on NFFICE foundations, targeting approximately 300 users and multi-company operations. - Designed electronic approvals, cross-system data integration, Korean-localized workflows, and an extensible path for AI/LLM-assisted search and operations.		
Underverse UI	Creator & Lead Developer	Private / Pro
- Designed a professional React and Next.js design system with 60+ TypeScript components, accessibility-focused APIs, dark mode, tree-shakeable exports, and four-language localization. - Transitioned the source code to a private repository and now lead development of Underverse Pro for commercial-grade distribution, curated releases, and professional documentation. npm package documentation		
IQ Tool	InfiniQ Internal Product	2025 - Present
Designed and deployed an internal tool featuring PCD/LiDAR point-cloud visualization with Three.js, plus Markdown editing and Mermaid diagram rendering for technical teams. 3d.infiniq.com.vn		

PROJECTS ACROSS PREVIOUS COMPANIES

Flex Collection	SOFTMART / LPBank	Sep 2023 - Jan 2025
Delivered a collection operations platform using React, TypeScript, MobX, .NET 5, ADO.NET, SignalR, and Oracle.		
MCredit FLEX CPM	SOFTMART / MCredit	Feb 2023 - Aug 2023
Built credit portfolio and collection workflows using React, TypeScript, MobX, .NET 6, ADO.NET, LINQ, and PostgreSQL.		
Innovation Project Management	R&D MobiFone	Aug 2022 - Dec 2022
Developed an internal project-management system using React, Material UI, .NET 5, EF Core, SQL Server, and IIS.		
mFWA	R&D MobiFone	Jan 2022 - Jul 2022
Built a full-stack application with Next.js, React, ASP.NET Core Clean Architecture, SignalR, PostgreSQL, and Python TCP services.		

TECHNICAL SKILLS

Leadership & Architecture	Cross-functional team leadership, delivery planning, solution architecture, Clean Architecture, code review, production ownership; Codex / Claude Code - advanced proficiency
Frontend	React, Next.js, TypeScript, Tailwind CSS, MobX, TanStack Query, accessibility, i18n
Backend & Real-time	C#, .NET, ASP.NET Core, REST APIs, Dapper, ADO.NET, SignalR, WebSocket, Hangfire, RabbitMQ, JWT, OAuth 2.0
Data & Infrastructure	PostgreSQL, Redis, SQL Server, Oracle, Docker, Jenkins, Nginx, HAProxy, Keepalived, NFS, Prometheus, Grafana, OpenSearch
